LONGEVITY
BUILDING ENERGY EFFICIENCY SOLUTIONS

Longevity Partners provide advisory and third party funding to private and public organisations to optimise energy efficiency in their properties at no up-front costs to them.

Energy price inflation together with cumbersome carbon related taxes and charges represent both economic and environmental risks to businesses. Business is already taking bold and ambitious action to help create the transformative change we need to drive energy efficiency, and we provide all the necessary tools to accelerate and scale up energy retrofits in the property sector, worldwide.

WHAT CAN WE DO FOR YOU?

Our services are designed to make energy efficiency easy for organisations and businesses.

Whether you need finance for new equipment, to find high quality and innovative equipment suppliers or understand how to improve your energy efficiency, we can provide practical support including:

- Energy site surveys to help you identify where energy savings can be made
- Business case and investment scenarios to help you identify the benefits of investing in energy efficiency
- Sourcing of innovative and competitive suppliers of energy efficient equipment, such as:
 1. Energy efficient lighting;
 2. Improved building controls;
 3. Automatic Monitoring and Targeting;
 4. Renewable energy;
 5. Energy efficient HVAC systems;
 6. Energy efficient heating controls;
 7. Innovative insulation materials.
- Flexible and affordable financing in the forms of leases, loans and hire purchase, designed to be offset by energy cost savings - either direct to you or via our recognised suppliers

HOW DOES IT WORK?

* 20% return on investment
