

# LONGEVITY

## PARTNERS

### Key responsibilities include:

- Providing clients with access to best in class strategic advice on how to approach sustainability within their property portfolios;
- Project managing sustainability services, e.g. Renewable Energy Project Management, Energy Efficiency Project Management, Energy Audits, Sustainability Strategy, BREEAM, BREEAM IN-USE, and MEES strategy work;
- Building strong client relationships and operating as a trusted advisor on investor portfolios, identifying the best-value approaches to mitigating risk;
- Pan-European travel to a multitude of client sites, working with a diverse range of stakeholders (from technical to C-suite) to identify and deliver on sustainability objectives; and
- Coordinating resources and people to ensure projects are delivered on time and to the highest standard.

The successful candidate will be driven by a passion for sustainability, as well as being ambitious, diligent and creative. He/she will strive to achieve a standard of excellence in all pursuits.

### You will also have:

- A degree (preferably Masters) in a sustainability-related or technical, numeric discipline (2:1 minimum);
- Deep knowledge of the technical aspects of built environment sustainability performance;
- Project management experience, including the ability to plan, resource, and direct complex assignments;
- Client exposure - working closely with clients to understand their needs and delivering bespoke solutions;
- Knowledge of business incentives and commercial drivers associated with sustainability performance initiatives; and
- European languages, particularly Dutch, are a key benefit.

This opportunity offers the successful candidate a career within an ambitious, rapidly accelerating start-up, already managing many landmark, international projects. Longevity Partners has a strong framework for growth, through which the Energy Consultant will make a tangible impact on the environmental performance of many prominent businesses and organisations.
